The Professional spot welding quick puller has various car body repair modes and is approved by many workshops. The dent repair glue pulling kit allows easy paintless dent repair of car body panels without welding.

The FY - 9028 has the most advanced international IGBT inverter technology combined with user friendly design and international advanced car body repair technology. It also includes a complete set of car body repair tools that meet international standards including various high quality quick repair pullers which can achieve excellent results on steel or iron panels.

Crossbar lifter can quickly repair dents on various medium or small cars and improve the efficiency and standard of sheet metal maintenance technicians. The crossbar lifter with 4 kickstands can save up to 70% working time and repair special parts of the car body all in one step with standard processing technology.

Using the crossbar lifter with 2 or 4 kickstands for challenging dent repairs ensure a 100% success rate. Spot welding quick puller can spot weld and dent pull car bodies and improve the working efficiency by up to 70%.

Dent Repair Glue Pulling Kit.
Quick repair method that won't damage paint surface.

This method can quickly repair minor collisions to the car body. After confirming the elastic deformation of the car body, safely and quickly repair it without damaging the paint surface or disassembling any components.
