

Car Repair System

FY - 9028

Part number: CRS9038

Pictures are for illustration purposes only - actual product may differ from images

The FY - 9038 is specialized for aluminium car body repair, which includes various combinations, such as tools for collision repair, IGBT inverter aluminium dent puller, crossbar lifters, dent repair glue pulling kit and so on. Optional tools and IGBT inverter aluminium dent pullers are available to meet users' needs.

IGBT Inverter Aluminium Dent Puller (AC 220V)

- With leading international inverter technology.
- Microprocessor control system optimizes the welding parameters.
- High precision power control system.
- Suitable for dent pulling and different kinds of car steels.
- High welding strength without damage to the metallic coatings and paint surfaces on the back.
- Digital display, simple to operate and easy to use.
- Able to weld 3mm - 8mm aluminium stud bolts, steel stud bolts and aluminium washers.

Dent Repair Glue Pulling Kit. Quick repair method that won't damage paint surface.

This method can quickly repair minor collisions to the car body. After confirming the elastic deformation of the car body, safely and quickly repair it without damaging the paint surface or disassembling any components.

Tools for Collision Repair (Optional)
