

DIGITAL DENT PULLING MACHINE FY-9BX

Pictures are for illustration purposes only - actual products may differ from images

Features

- Microprocessor control system optimises the welding parameters. Due to the adoption of advanced digital control technology and user friendly design, all you have to do is select the welding current corresponding to the workpiece thickness to achieve the best weld quality.
- Automatic mains voltage monitoring.
- Welding gun test function to evaluate the status of the welder.
- Overheat protection.
- Suitable for dent pulling of different kinds of car steels such as conventional steel, stainless steel etc.
- Various welding procedures are available such as shrinking, washer direct-pulling, spot welding, flattening, waveform wire, stud welding, OT washer, triangle washer, etc.
- Digital control system with steady power output.

PRODUCT SPECIFICATIONS

Input Voltage:	220V 50/60Hz
Max rated input power:	12.3KVA
Max rated input current:	32A
Max output current:	3500A
Output voltage:	1 - 13V
No-Load output Voltage:	50V
Welding Time:	0 - 99's
Weight:	35/20kg
Dimensions:	930 X 350 X 830mm 220 X 350 X 250mm
