

PLASTOCLIP

PLASTOCLIP SYSTEM 803000

KAMATEC
Consulting - Innovation - Production

N.B. Pictures are for illustration purposes only - actual products may differ from images

Product Description

Plastoclip is the world's first battery-operated tool used to repair all kind of plastic parts. Thanks to Kamatec, there is now a comfortable and continuous method to repair damaged parts - by melting clips of stainless steel into plastic.

The **Plastoclip** system is characterised by three innovative aspects:

- The battery operating system.
- Better accessibility by using angled pieces of adapters and LED lights.
- Adjustable power settings.
