

## VAS 003A WELDING FUME EXTRACTION SYSTEM

Pictures are for illustration purposes only - actual products may differ from images

### ITEMS SUPPLIED

- 1X Filter System Type SF II IFA
- 2X Hose Arms, 3m Each
- 1X Power cord, 5m

### TECHNICAL DATA

Output:	2.2KW
Certification:	CE I UL
Air Consumption:	3500 m3/h
Noise Level:	72 db (A)
Working Temperature:	+5 bis 35 C
Frequency:	50 Hz   60Hz
Supply Voltage:	400 V   220 V
Protection Category:	IP54

The Wieländer & Schill Welding Fume Extraction unit is a mobile extraction and filtering unit for extracting and filtering fumes generated during thermal joining and cutting of metals. The unit is equipped with a hose extraction arm with internal joints. The extraction arm can easily be adjusted in all positions. This is due to a new type of spring support inside the extraction arm. The suction hood with an integrated throttle valve can swivel in any direction.

The filter system serves to extract and filter air containing harmful substances. In the filter section of the system, the coarse dust particles are first separated at the pre-filter mat. The subsequent particle filter also cleans the fine smoke and dust. An automatic filter monitoring system indicates when it is necessary to clean or change the filters. The cleaned air is returned to the working room. For the application "adhesive fumes" an activated carbon filter is additionally used, which binds gases and unpleasant odours.
